A heart failure diagnosis has significant impact on a patient's life. Cardiologists and other care team members can make a difference by ensuring that the patient and their caregivers have access to resources, tools, and support to live better with heart failure.

Join the HeartLife Foundation, Canada's first and only national patient-led Heart Failure organization, for a discussion around the resources available for Canadian patients living with HF.

This Corridor Consult is available **LIVE** for the **VIRTUAL** audience and **ON-DEMAND** for all delegates after the congress
